### Note

Dr. Howard Beye Hamilton was born in Oak Park Illinois on December 4, 1918. He graduated from the University of Rochester in New York in 1941 and from Yale University School of Medicine in 1945. Hamilton served in the United States Navy from 1942-1945, during World War II. In the late 1940s and early 1950s Hamilton conducted research at Massachusetts General Hospital, Harvard University, the Long Island School of Medicine, the New York College of Surgeons, and the University of Tokyo in Japan. In 1956 Dr. Hamilton moved to Hiroshima, Japan, where he lived for the next thirty years. After his move to Japan, Hamilton served as the Chief of Clinical Laboratories for the Atomic Bomb Casualty Commission (ABCC) from 1956 until its dissolution in 1975. Hamilton worked in the same capacity for the Radiation Effects Research Foundation (RERF), which succeeded the ABCC, until 1984. Between 1984 and 1986 Dr. Hamilton began transitioning into retirement; he continued to work as a consultant for the RERF during this time.

Dr. Hamilton was a consummate scholar and published extensively throughout his career.

Hamilton published papers on topics including endocrinology, steroid chemistry, enzyme kinetics, hemoglobinopathies, the structure and function of hemoglobin, genetic polymorphisms, biochemical genetics, the long term after-effects of exposure to ionizing radiation, and epidemiology of cardio-vascular disease.

Dr. Hamilton's hobbies included playing tennis and practicing the Japanese theatrical art of Noh, which features dramatic masks and carefully defined movements. After his retirement, Dr. Hamilton catalogued Noh and Kabuki works and published Noh plays. In some circles, Dr. Hamilton was known as much for his enthusiastic patronage and participation in Noh as he was for his work with the ABCC and RERF.

Dr. Hamilton died on May 9, 2007 at his home in Falls Church, Virginia. He was 88 years old.

### Scope and content

---

The Howard B. Hamilton, MD, papers, MS 066, includes material from 1945-1997 related to the Atomic Bomb Casualty Commission (ABCC) and the Radiation Effects Research Foundation (RERF). Hamilton was the Chief of Clinical Laboratories for the Atomic Bomb Casualty Commission from 1956 until its dissolution in 1975. He served in the same capacity for the Radiation Effects Research Foundation, which succeeded the ABCC, until 1984. This collection encompasses this period of time in Dr. Hamilton's career, as well as his related scholarly work after his retirement from RERF. Dr. Hamilton donated his collection of letters, reprints, newspaper articles, photographs, memos, and ephemera to the John P. McGovern Historical Collections and Research Center between 1985 and 2002. The collection is in good condition and consists of 3.75 cubic feet (8 boxes).

This collection contains eight series: I. Correspondence; II. Memorandum, Notes, Books; III. Conferences, Congresses, Manuscripts; IV. Reprints; V. Newspaper Articles; VI. Akio Awa Cartoons; VII. Additional Correspondence; VIII. Addendum Series. This collection contains many reprints of articles Hamilton wrote or co-wrote on topics including the structure and function of hemoglobin, biochemical genetics, and the long term after-effects of exposure to ionizing radiation. One highlight of the collection is a series of cartoons, Series VI, created by Hamilton's friend Dr. Akio Awa that gives a unique look into the daily goings-on of the ABCC and RERF. Another collection highlight is the photographs in the Addendum Series, Series VIII, which includes images of former United States Senator Ted Kennedy who visited RERF in the late 1970s. Photos also include group photos from many ABCC and RERF conferences and events.

This collection was donated to the Historical Research Center over a number of years, and the material was processed at different times by different people, which resulted in several different organizational schemes being used. During the most recent processing of the collection the arrangement of the material was left unchanged to maintain continuity and for the sake of scholarly citations that may have been made previously. Hamilton was born in Oak Park Illinois on December 4, 1918. He graduated from the University of Rochester in New York in 1941 and from Yale University School of Medicine in 1945. Hamilton served in the United States Navy from 1942-1945, during World War II. In the late 1940s and early 1950s Hamilton conducted research at Massachusetts General Hospital, Harvard University, the Long Island School of Medicine, the New York College of Surgeons, and the University of Tokyo in Japan.

Hamilton died on May 9, 2007 at his home in Falls Church, Virginia. He was 88 years old.

The collection is in good to excellent condition depending on the age of the individual item and how carefully it was stored and preserved in the years before it entered the HRC's collection. Dr. Hamilton donated his large collection of letters, reprints, newspaper articles, photographs, memos, and ephemera to the John P. McGovern Historical Collections and Research Center between about 1985 and 2002. The collection consists of 3.75 cubic feet (8 boxes) and is collection MS 066.

### Series MS066-S1 : Series I: Correspondence;

Date: 1960-1985 (creation)

Scope and content: Scope and Content Note: The first box of material in this series is arranged chronologically. The second box is arranged alphabetically by author or recipient's last name, so letters to or from "Awa" (for example) in the second box would be in the folder for "A" correspondence. The first half of the third box is arranged chronologically, and the second half is arranged by subject. (The boxes in Series I had been processed previously and the arrangement of the material was left unchanged to maintain continuity and for the sake of citations that may have been made previously.)

<b>Series MS066-S8 : Series VIII: Addendum Series;</b>			
<u>Date:</u> 1948-1997 (creation)			
<u>Scope and content:</u> Scope and Content Note: This series contains material that was added to the MS 066 collection after it was initially processed and organized. Folders 1-12 were originally part of series VII, but it clearly makes more sense to include them in the addendum series than in a series of correspondence. It should be noted that Folder 1 of series VIII was previously Folder 72 of series VII, Folder 2 of series VIII was previously folder 73 of series VII, and on through Folder 12 of series VIII, which was previously Folder 83 of series VII.
